THE FIVE Ps

ANOTHER WAY TO LOOK AT THE SDGs

“OUR COMMON FUTURE”

Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

**DECADE
OF >>>
ACTION**

The Decade of Action will:

Mobilize everyone, everywhere

We will work to create an unstoppable force linked to the Global Goals.

We will identify risks to ensure no one is left behind.

This requires each of us to take action—individually and collectively, locally and globally.

Demand urgency and ambition

We must be the generation to end extreme poverty, win the race against climate change and conquer injustice and gender inequality.

We will hold leaders to account and point to what is possible when action delivers results.

Supercharge ideas to solutions

We will shine a light on solutions that expand access and demonstrate the possibilities of ideas.

We will drive sustainable innovation, financial investments and technology—while making space in our communities and cities for young people to lead.
