

## MARIE SKŁODOWSKA-CURIE POSTDOCTORAL FELLOWSHIPS 2025

### EXPRESSION OF INTEREST FOR HOSTING MARIE CURIE FELLOWS

#### HOST INSTITUTION

NOVA Information Management School (NOVA IMS)

#### RESEARCH GROUP AND URL

<https://magic.novaims.unl.pt/>

#### SUPERVISOR (NAME AND E-MAIL)

Mauro Castelli [mcastelli@novaims.unl.pt](mailto:mcastelli@novaims.unl.pt)

#### SHORT CV OF THE SUPERVISOR

Mauro Castelli has a Ph.D. in Computer Science obtained at the Università di Milano Bicocca (Italy), a Master's in computer science, and Degree in Computer Science obtained at the Università di Milano Bicocca (Italy). He is currently a Full Professor at the Universidade Nova de Lisboa, director of the bachelor degree in Data Science, and member of the Scientific Council of NOVA Information Management School (NOVA IMS). He is also a researcher at the Information Management Research Center of this university. He participated as a principal investigator, coprincipal investigator, or work package leader in different research projects at national and international levels. He collaborated with several European universities on the application of machine learning methods for addressing complex real-world problems. It has international collaborations with researchers in more than twenty different countries and with universities recognized as leaders in the area of artificial intelligence. He is a member of ACM (Association for Computing Machinery). He is the author of more than 200 scientific publications and has presented about fifty seminars, conferences, and communications. He was awarded in 2013 and 2014, in the framework of the main European conference of Artificial Intelligence and Evolutionary Computing, for the quality and contribution of his scientific research. He is in the Stanford list of the the 2% of the world's most cited researchers. His research focuses on the following areas: Deep Learning, Large Language Models, Machine Learning, Evolutionary Computation. He was the supervisor of more than 140 master theses and nine Ph.D. theses in the field of Machine Learning and Artificial Intelligence.

#### 5 SELECTED PUBLICATIONS

- Marchetti, F., Pietropolli, G., Verdù, F. J. C., Castelli, M., & Minisci, E. (2024). Automatic design of interpretable control laws through parametrized Genetic Programming with adjoint state method gradient evaluation. *Applied Soft Computing*, 111654.
- Santos, F. J., Gonçalves, I., & Castelli, M. (2023). Neuroevolution with box mutation: An adaptive and modular framework for evolving deep neural networks. *Applied Soft Computing*, 147, 110767.
- Philippi, D., Rothaus, K., & Castelli, M. (2023). A vision transformer architecture for the automated segmentation of retinal lesions in spectral domain optical coherence tomography images. *Scientific Reports*, 13(1), 517.

#### PROJECT TITLE AND SHORT DESCRIPTION

**Efficient Modular Architectures for Scalable Large Language Models.** This research will explore novel modular and sparsely-activated transformer architectures to address the computational bottlenecks of large-scale LLM training and inference. The fellow will design models that adaptively scale capacity depending on task complexity. Emphasis will be placed on energy-efficient training and inference. The project addresses the pressing need for resource-conscious LLM design, especially in decentralized or low-resource environments.

#### SCIENTIFIC AREA WHERE THE PROJECT FITS BEST\*

Information Science and Engineering (ENG)
